Lumpfish Caviar

Lumpfish caviar is one of the less costly types of caviar, a delicacy made of salted fish eggs. The lumpfish is a thick-skinned, lumpy cold-water fish found mostly in the North Pacific, but also in the North Atlantic and Arctic oceans. Lumpfish caviar is beloved for its tiny, crunchy, colorful eggs and their wonderful salty taste. They are usually served as appetizers or hors d'oeuvres and make a striking garnish. Use to top homemade potato chips, blinis, or hard boiled eggs. Mix into pasta or omelets for extra texture & flavor.
