Wild West Steelhead Trout

Wild West Steelhead is a Canadian aquaculture operation. As **a fully integrated producer** they control all stages of production – from egg incubation to the final consumer-ready product. Rich colour, **superior taste**, and *consistent freshness* make them Canada's preferred steelhead supplier. See the difference for yourself!

Wild West Steelhead is located on the banks of **Lake Diefenbaker in Southwest Saskatchewan!**

Steelhead is a member of the salmon family, very similar to a rainbow trout. Where a rainbow trout spends its entire life in freshwater, steelhead are equally at home in fresh or salt water.

Wild West Steelhead are **excellent for the health-conscious**; studies have shown that their trout contains 3 grams of omega-3 fatty acids per 100g

Did you know?

The aquaculture industry in North America uses fewer antibiotics per kilo of finished product than any other agricultural livestock industry!
